*BIBLIOGRAPHY, *LEARNING THEORIES, LEARNING EXPERIENCES,
 *TRANSFER OF TRAINING, BEHAVIORAL SCIENCE RESEARCH,
 *HISTORICAL REVIEW, RESEARCH PROJECTS, URBANA, ILLINOIS

THIS BIBLIOGRAPHY ON TRANSFER OF LEARNING STUDIES WAS COMPLETED FOR
 U.S. OFFICE OF EDUCATION CONTRACT NO. 4-20-002 AS APPENDIX "A"
 (SECTION TWO) TO THE FINAL REPORT. IT CONTAINS 1,775 TITLES FROM THE
 PERIOD 1890 TO 1966 ON TRANSFER OF LEARNING. THE CONCERN WAS TO
 COMPILE THE EMPIRICALLY BASED PRINCIPLES RELATING TO TRANSFER OF
 TRAINING IN A FORM THAT WOULD HAVE VALUE TO EDUCATORS. STUDIES BASED
 UPON ANIMAL EXPERIMENTS WERE GIVEN SECOND PRIORITY, HOWEVER IF A
 PRINCIPLE BASED UPON AN ANIMAL STUDY SEEMED TO HAVE EDUCATIONAL
 RELEVANCE, IT WAS INCLUDED. ENTRIES WERE ARRANGED ALPHABETICALLY BY
 AUTHOR. (JM)

SECTION II
FINAL REPORT

This is Section II of Final Report which contains the bibliography relating to the material covered in Section I.

The code preceding each entry in the bibliography decodes as follows:

- (a) The first number is a TRL nominal number for this bibliography. It is number 7.
- (b) The next two digits are the last two digits of the date of publication of the entry.
- (c) The letter indicates the alphabetic position of the first author's last name.
- (d) The next three digits are a serial number of the entry. Each is a unique number.

Lawrence M. Stolurow,
Professor
Department of Psychology
Bureau of Educational Research

This bibliography on transfer of training studies was completed during the life of USOE Contract 4-20-002. It contains 1775 titles from the period 1890 to 1966 on transfer of training. The concern of the project was to compile the empirically based principles relating to transfer of training in a form that would have value to educators. Consequently, studies based upon animal experiments were given second priority. The selection of human studies was tempered by an effort to provide coverage of topics. If the principle was based upon an animal study, but seemed to have educational relevance, it was included.

Mr. Stephen H. Williams wrote the program for the IBM 1460. The seven digit code breaks down as follows: (a) the first column is a 7 to indicate the TRL bibliography number; (b) the next two columns indicate the last two digits of the year in which the article was published; (c) the last four columns indicate both the alphabetic order and the serial number of the article. This includes space for the key-word code.

Because of the peculiarities of the print chain, arrangement A, the following symbols appear in the attached sheets:

- (a) a % appears instead of a left parenthesis.
- (b) a ¶ (lozenge) appears instead of the right parenthesis.
- (c) a double period .. appears instead of a colon.

In addition, there are no apostrophes; instead, space is allowed before the s.
